

Samuel Bassong

Software Engineer

sam.bassong@gmail.com | 206-402-7371 | Bellingham, WA
[linkedin.com/in/sambassong](https://www.linkedin.com/in/sambassong) | sambassong.com | github.com/sbassong

Skills

Languages: JavaScript/TypeScript, Python, HTML, CSS, SQL, NoSQL

Frontend: React, Next.js, Vue, Figma, Tailwind CSS, Mapbox GL JS, D3.js

Backend: Node.js, Express.js, Flask, MongoDB, PostgreSQL, RESTful APIs

DevOps, Testing & Tools: AWS (S3, Lambda, CloudFormation, CloudFront), Git, GitLab, CI/CD, Cypress, Jest

Experience

Software Engineering Instructor Associate

General Assembly Space, Remote

February 2024 — Present

- Developed deployable reference applications across MERN (MongoDB, Express, React, Node.js) and Python/Django ecosystems, demonstrating best practices in scalable architecture, UI development, database modeling, and RESTful API design
- Conducted daily code reviews and pair programming sessions to diagnose logic errors, enforce clean coding standards, and implement Test-Driven Development across diverse JavaScript and Python codebases
- Partnered with enterprise stakeholders (Saudi Digital Academy, Adobe) to accelerate technical proficiency for CS graduates, bridging the gap between theoretical concepts and production-ready engineering

Software Engineer

Locana, Seattle, WA

April 2022 — September 2023

- Spearheaded 5 mission-critical features for an enterprise MVP launch, playing a pivotal role in securing a \$3M contract extension with a top Fortune 100 company and leader in the wireless network sector
- Developed and maintained software across 3 full-stack geospatial applications using JavaScript, React, and Python in collaborative Agile SCRUM teams with developers, product managers, UX designers, and stakeholders
- Engineered performant backend services and API resources with Node.js and Python, integrating AWS, MongoDB, and Postgres to process and analyze large geospatial datasets for data visualization features
- Implemented engaging, user-centric UI features using React and Mapbox, integrating REST APIs and data visualization tools like D3 and Tableau to improve user experience on data-intensive platforms
- Ensured production stability by configuring CI/CD pipelines and implementing automated tests with Cypress and Jest, boosting testing coverage from 82% to 87% and increasing the testing integration rate by nearly 15%

Front-end Web Developer

Center Centre, Remote

December 2021 — April 2022

- Contributed to a 9% quarterly revenue growth by developing responsive, customer-facing web pages and intuitive sales pipelines using JavaScript, HTML, and CSS to translate pixel-perfect Figma designs
- Accelerated marketing production by over 30% by creating an internal CSS framework and custom, accessible WCAG-compliant HTML snippets, which directly led to faster and more consistent development operations
- Streamlined developer team efficiency by overhauling technical documentation, a strategic improvement that effectively cut new-hire onboarding time by 50% and sped up product delivery by nearly 20%

Education & Certifications

Bachelor of Science, Computer Science (3.75 GPA), *Oregon State University*

December 2026

Certified AWS Cloud Practitioner, *Amazon Web Services (AWS)*

September 2023

Full-stack Software Engineering, *General Assembly*

October 2021
